

Kingswear, Torpoint and the College Site on Marksbury Road

2nd Public Consultation Event - 18 April 2009

Questionnaire

Introduction

Welcome to the second public consultation event for the redevelopment of the Kingswear Road, Torpoint Road and College on Marksbury Road site.

The information on display today summarises;

- a) the design team's brief for the design of the new development,
- b) the feedback we have already received from members of the public and
- c) our design aspirations for the site.

We then describe 3 alternative design options for the redevelopment of the site that reflect the information we have gathered to date.

We would be grateful if you spare a moment to complete this questionnaire, giving us your views on the proposals, so that we can take on board your comments as we develop the design of the scheme in more detail.

Thank you.

Section 1 - Community Feedback and Objectives

The information on the boards summarises the feedback that we have already received from members of the local community, both at the 1st public event in February and at subsequent meetings with the Communities in Partnership group.

Please use the box below to let us know if you agree with the issues that have been raised or if you think we have missed anything important to you.

Section 2 - Design Aspirations

The Design Team has also established a number of design aspirations that we think will be important to deliver in the redevelopment of the site.

Please let us know if you agree or disagree with the aspirations we have listed below.

ASPIRATION	AGREE	DISAGREE	DON'T KNOW
1- Create a continuous green corridor across the slope.			
2- Connect the slope to Marksbury Road with a generous green boulevard.			
3- Create new developments that face the green to improve safety and security.			
4-Introduce new house types into the area.			
5- Connect the roads to avoid dead ends.			
6- Enhance the enjoyment of green through better pedestrian routes and signage.			
7- Enhance the view towards the slopes.			
8- Consider view corridors from the site.			
9. Introduce new uses to the site.			

Section 3 - The Options

Having understood the brief, listened to feedback from the local community and developed design aspirations for the scheme we have now created 3 design options for the redevelopment of the site.

For each option please let us know whether there are aspects that you like, dislike or would change.

OPTION	LIKE	DISLIKE	WOULD CHANGE
OPTION 1			
OPTION 2			
OPTION 3			

Section 4 - General Comments

Please use the box below to let us have any general comments that you have on this executive or the options that we have developed so far.

Please hand your complete questionnaire to a member of the design team or alternatively, you can post it to;

Mr Sean Griffiths
FAT, Unit 2
49-59 Old Street
London, EC1V 9HX
