Mosaic Public Sector classifies all consumers in the United Kingdom by allocating them to one of 7 Supergroups, 15 Groups and 69 Types. These paint a rich picture of UK citizens in terms of their socio-economic and socio-cultural behaviour.

Mosaic Public Sector Supergroups	Your area/file	%	Comp.	%	Pen. %	Index
A Rural and small town inhabitants	0	0.00	2,831	1.55	0.00	0
B Affluent households	4	0.38	9,461	5.18	0.04	7
C Middle income families	4	0.38	19,420	10.64	0.02	4
D Young people starting out	335	31.51	62,350	34.16	0.54	92
E Lower income residents	369	34.71	55,708	30.52	0.66	114
F Elderly occupants	28	2.63	11,980	6.56	0.23	40
G Social housing tenants	323	30.39	20,789	11.39	1.55	267
Total	1,063	100	182,539	100	0.58	100

The supergroups have been created to provide a high level overview of an area and are constructed by combining together the relevant groups.

These groupings are:

Supergroup A - Groups A and B

Supergroup D - Groups G and H

Supergroup G - Groups N and O

Supergroup B - Groups C and D

Supergroup E - Groups I, J and K

Supergroup C - Groups E and F

Supergroup F - Groups L and M

Profile Reports Explained:

A profile report allows you to understand the characteristics of a citizen / prospect file or a geographical catchment, compared to a comparison file or area.

For more information on profiles please refer to the knowledge base at <http://www.publicsectorknowledgebase.co.uk>

Your area/file:
The number of records in your chosen area that fall within each Mosaic group.

Comparison area/file:
The number of records in your chosen comparison area that fall within each Mosaic group.

Penetration Percentage:
Shows the proportion of the comparison area that is made up of your area's population for each Mosaic group. For example, if the penetration of group A was 10%, then your area represents 10% of all group A's living within the comparison area.

Example profile

Client: **Client Name**
Your contact: **account manager name**

Mosaic Public Sector classifies all consumers in the United Kingdom by allocating them to one of 7 Supergroups, 15 Groups and 69 Types. These paint a rich picture of UK citizens in terms of their socio-economic and socio-cultural behaviour.

Mosaic Public Sector Supergroups	Your area/file	%	Comp.	% Pen.	% Index	
A Rural and small town inhabitants	53	0.41	33,425	1.03	0.16	40
B Affluent households	778	6.02	298,991	9.23	0.26	65
C Middle income families	1,009	7.80	412,985	12.74	0.24	61
D Young people starting out	3,751	29.00	1,169,884	36.10	0.32	80
E Lower income residents	2,263	17.50	548,859	16.94	0.41	103
F Elderly occupants	622	4.81	118,528	3.66	0.52	131
G Social housing tenants	4,457	34.46	658,052	20.31	0.68	170
Total	12,933	100	3,240,724	100	0.40	100

Index:
Shows how close your area % is to the comparison area %.
An index of 100 means your area % is equal to the comparison area %.
Below 100 means your area % is lower than the comparison area %.
Above 100 means your area % is higher than the comparison area %.

Your area/file percentage:
The number of records in your chosen area that fall within each Mosaic group as a percentage of the total in your area.

The supergroups have been created to provide a high level overview of an area and are constructed by combining together the relevant groups. These groupings are:

- Supergroup A - Groups A and B
- Supergroup B - Groups C and D
- Supergroup C - Groups E and F
- Supergroup D - Groups G and H
- Supergroup E - Groups I, J and K
- Supergroup F - Groups L and M

Mosaic Public Sector Groups	Your area/file	%	Comp.	% Pen.	% Index	
A Residents of isolated rural communities	0	0.00	1,150	0.04	0.00	0

L Active elderly people living in pleasant retirement locations	173	1.34	57,056	1.76	0.30	76
M Elderly people reliant on state support	449	3.47	61,472	1.90	0.73	183
N Young people renting flats in high density social housing	4,277	33.07	621,754	19.19	0.69	172
O Families in low-rise social housing with high levels of benefit need	180	1.39	36,298	1.12	0.50	76
Total	12,933	100	3,240,724	100		

Comparison area/file percentage:
The number of records in your chosen comparison area that fall within each Mosaic group as a percentage of the total in the comparison area.

Index Value Graph:
Shows the index value visually.
The centre line is 100, where your area % and the comparison area % are equal.
Left of centre means that the Mosaic Group is underrepresented in your area/profile compared to the comparison area/profile.
Right of centre means that the Mosaic Group is overrepresented in your area/profile compared to the comparison area/profile.

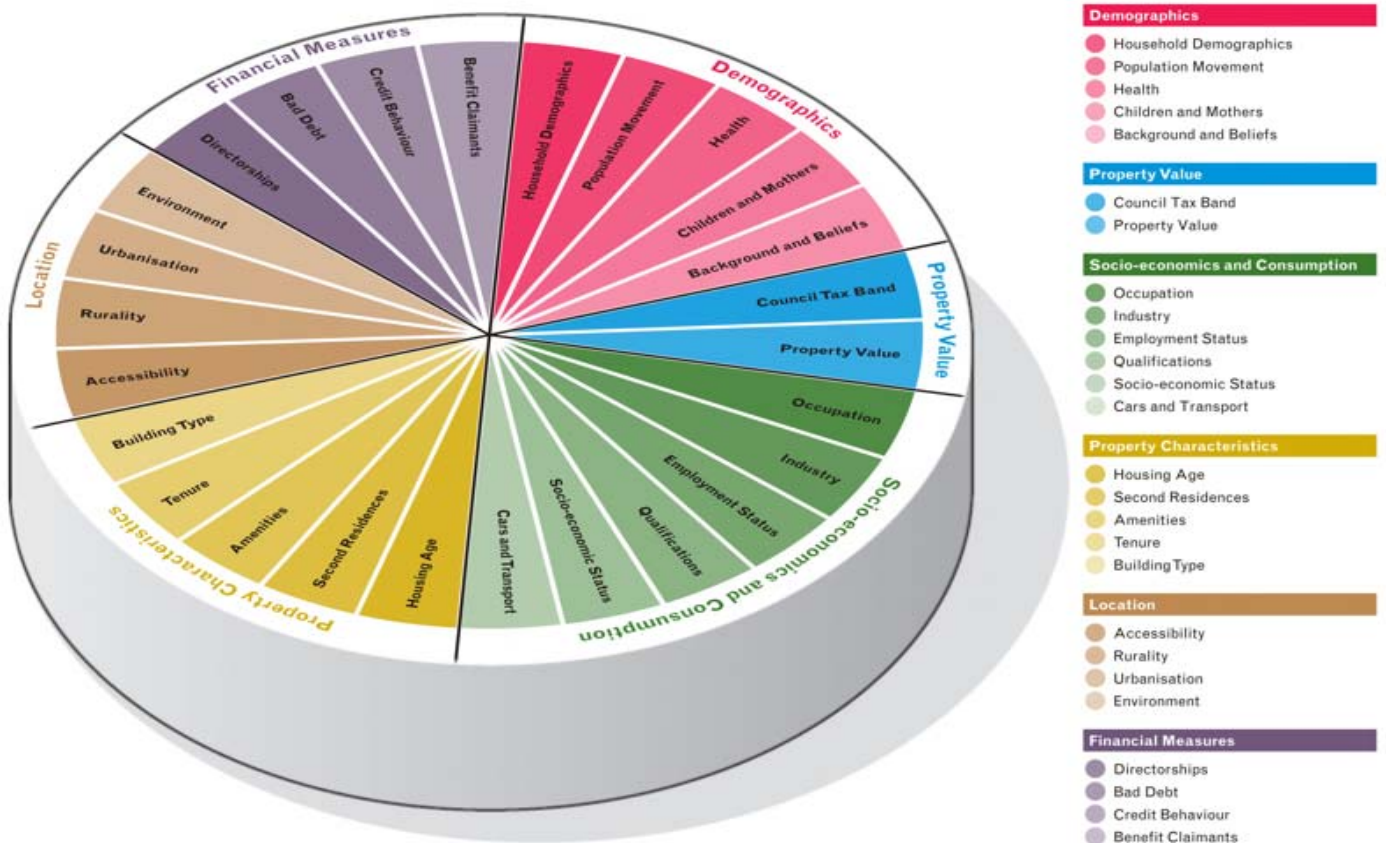

Mosaic Public Sector Data Sources

Data Sources

A total of 440 data elements have been used to build this latest version of Mosaic Public Sector. These have been selected as inputs to the classification on the basis of their volume, quality, consistency and sustainability.

62 percent of the information used to build Mosaic Mosaic Public Sector is sourced from a combination of data that includes Experian's UK Consumer Dynamics Database, which provides consumer demographic information for the UK's 47 million adults and 24 million households. This database is built from an unrivalled variety of privacy-compliant public and Experian proprietary data and statistical models. These include the edited Electoral Roll, Council Tax property valuations, house sale prices, self-reported lifestyle surveys and other compiled consumer data.

The remaining 38 percent of the data is sourced from Census current year estimates that Experian has produced by utilising its wealth of data assets to track change in key 2001 Census variables. All of the information used to build Mosaic Public Sector is continuously updated. This enables Experian to verify and update the classification twice a year.

The Mosaic Family Tree

The Mosaic Family Tree illustrates the major demographic and lifestyle polarities between the Types and Groups, and shows how the Mosaic Types relate to each other.

Mosaic Migration helps to determine the probable location paths of different Mosaic Types and how households might move through the Mosaic Family Tree over time. This is useful for understanding the origin, stability and aspirations of the people within each Mosaic Type.
