Community Involvement

We are committed to community involvement through all our projects. Local people know a great deal about their own neighbourhoods. We use a number of techniques to capture local views. These are essential to help shape quality places and guide new development.

Some examples of our projects include:

- ***St Paul's Park: an award winning community space.*** This distinctive space resulted from a collaborative design approach. Local people, the police and the City Council were all involved.
- ***The Community Vision for Lockleaze: an integrated approach to creating a sustainable community.*** The City Design Group supported residents to produce a vision that ensures good development. The Council has endorsed the vision and the government has allocated Lockleaze, Neighbourhood Vanguard status

- ***Know Your Place: a ground breaking online neighbourhood information resource.*** This helps local people consider how new development is integrated into their neighbourhood area.

1. Community event at St Paul's Park
2. Community involvement to develop the Community Vision for Lockleaze.
