

Walking for Health Bristol

Volunteer Route Explorer Task Description

Description of role:

To investigate and map possible walk routes with the view to these trails becoming led health walks.

Duties/responsibilities:

This position is flexible. Training, support and equipment will be provided.

- Research appropriate locations for walks.
- Collect materials (maps, information etc) on locations and routes.
- Undertake risk assessment training.
- Keep a written record of the risk assessment for each walk.
- Complete a route planner form with details of the walk.
- Note down and report any negative sightings that could lead to environmental improvement of the route (e.g. broken stiles, overgrown vegetation, burnt out cars etc).
- File route planner form, risk assessment and other information of researched routes in appropriate place (as shown by supervisor).
