

City Design Group Selected Projects

Arnos Vale Cemetery Improvements

The restoration and regeneration of a nationally important Victorian garden cemetery. Our project management team delivered this Heritage Lottery funded project working with local community groups. The cemetery is now run by a trust that will secure its future and maintain public access.

The Community's Vision for Lockleaze

A vision document which promotes an integrated approach to creating a sustainable community. We supported local residents to produce vision for their area that ensures good development. Endorsed by the council, Central Government have now awarded Lockleaze Neighbourhood 'Front Runner' status.

Former Community Association Site Development Brief, Lockleaze

Urban design principles to guide the mixed-use redevelopment of this prominent and under-used site. Our brief illustrates how the site and Gainsborough Square could be improved.

It reflects the aspirations set out in 'The Community's vision for Lockleaze'.

City Design Group Selected Projects

BRT Visual Identity Guidelines

Our conceptual design work has illustrated how a coordinated visual identity could be applied to stops and rapid transit vehicles.

Our concept for the proposed stop at the Arnolfini is based on an on street platform. The design concept integrates passenger transport information.

Know your place

Our ground breaking online resource that is helping community groups to:

- develop a deeper understanding of how places have evolved over time
- contribute to the development of the city's historic environment record
- consider how new development is integrated into their neighbourhood areas.

St Paul's Park

Our award winning redesign of a community park, including an upgraded play area, as part of the neighbourhood renewal project. We involved local people, police and the other council departments in the design process. This has resulted in a safer, much better-used space.
