

The Bristol Standard Purposes

The purpose of the Bristol Standard is to:

- Establish a clear understanding of vision, values, principles and practice
- Achieve high quality provision for all children from birth in a culture of inclusion and anti-discriminatory practice
- Enable teams to work together, have a voice and learn from each other
- Celebrate current good practice and develop the quality and effectiveness of provision through a continuous process of reflection
- Enable settings to develop and improve the quality and effectiveness of their practice
- Support the development of genuine partnerships with children's families or carers, other professionals and the local and wider community
- Support a culture of shared leadership – key people who motivate, sustain, challenge and empower others
- Support a process of continuous professional development

These purposes have been mapped to the twelve Quality Improvement Principles developed by the National Quality Improvement Network.

This Quality Improvement scheme has used the National Quality Improvement Network principles, in discussion with their local authority and partner settings, in order to review and develop their Quality Improvement Programme
NQIN (2009)
