Bristol's mid-2019 population is estimated by the Office for National Statistics (ONS) to be 463,400. The overall population number is broadly unchanged in the 12 months between 2018 and 2019. Mid-2019 represents a break in a recent pattern of historically high annual population growth of between 0.4% and 2.4% in the years since 2002. The last time that there was no growth in Bristol's population was between 2001 and 2002. Nationally, the UK population increased by just 0.5% between 2018 and 2019, this is the slowest rate for 15 years.

### Annual population change in Bristol 2001-2019

The main factors effecting Bristol's population change include the lowest number of births for 13 years, with 5,669 births between 2018 and 2019, alongside a large fall in net international migration. The year to mid-2019 saw fewer international immigrants (-450, a 6% decrease) and more international emigrants (3,265, a 60% increase) resulting in negative net international migration, with more people now leaving Bristol to live outside the UK than arriving from outside the UK.

#### Notes and Definitions

The estimated resident population of an area includes all those people who usually live there regardless of nationality. Arriving international migrants are included in the usually resident population if they remain in the UK for at least a year. Emigrants are excluded if they remain outside the UK for at least a year. Armed forces stationed outside of the UK are excluded. Students are taken to be usually resident at their term time address.
