**Subject:** Lawrence Weston Neighbourhood Development Plan

Dear Sir/Madam,

Network Rail has been consulted by Bristol City Council on the Lawrence Weston Neighbourhood Development Plan. Thank you for providing us with this opportunity to comment on this Planning document.

Network Rail is a statutory undertaker responsible for maintaining and operating the country's railway infrastructure and associated estate. Network Rail owns, operates, maintains and develops the main rail network. This includes the railway tracks, stations, signalling systems, bridges, tunnels, level crossings and viaducts. The preparation of development plan policy is important in relation to the protection and enhancement of Network Rail's infrastructure. In this regard, please find our comments below.

Network Rail would draw the Neighbourhood Planning Groups attention to the following (which applies to England only):

**The Town and Country Planning (Development Management Procedure) (England) Order 2015  
 Publicity for applications for planning permission within 10 metres of relevant railway land**

**16.—**(1) This article applies where the development to which the application relates is situated within 10 metres of relevant railway land.

(2) The local planning authority must, except where paragraph (3) applies, publicise an application for planning permission by serving requisite notice on any infrastructure manager of relevant railway land.

(3) Where an infrastructure manager has instructed the local planning authority in writing that they do not require notification in relation to a particular description of development, type of building operation or in relation to specified sites or geographical areas ("the instruction"), the local planning authority is not required to notify that infrastructure manager.

(4) The infrastructure manager may withdraw the instruction at any time by notifying the local planning authority in writing.

(5) In paragraph (2) "requisite notice" means a notice in the appropriate form as set out in Schedule 3 or in a form substantially to the same effect.

Councils are urged to take the view that level crossings can be impacted in a variety of ways by planning proposals:

- By a proposal being directly next to a level crossing
- By the cumulative effect of development added over time
- By the type of crossing involved
- By the construction of large developments (commercial and residential) where road access to and from site includes a level crossing
- By developments that might impede pedestrians ability to hear approaching trains
- By proposals that may interfere with pedestrian and vehicle users' ability to see level crossing warning signs
- By any developments for schools, colleges or nurseries where minors in numbers may be using a level crossing.

We would therefore appreciate Lawrence Weston Neighbourhood Planning Group providing Network Rail with an opportunity to comment on any future planning applications should they be submitted for sites adjoining the railway, or within close proximity to the railway as we may have more specific comments to make (further to those above).

We trust these comments will be considered in your preparation of the forthcoming Neighbourhood Plan document.

Regards,

**Barbara Morgan**  
 Town Planning Technician (Western and Wales)
