

# Ward Profile Report

(November 2023)

This dashboard compares the 34 Bristol City Council wards with the Bristol average, across a range of data subjects.

**Update November 2023 (v3.5):**

Data has been updated for the following topics:

- **Children with excess weight (under Healthy Lifestyles)**
- **Life Expectancy**
- **Premature Mortality**

**Update October 2023 (v3.4):**

Data has been updated for the following topics:

- **Adult Social Care**
- **Children Services**
- **Claimant Count**
- **Education**
- **House Prices**
- **Jobs**
- **Pension Credit**
- **Youth Offending**

A table of contents has also been added, displaying the range of topics covered within Ward Profiles. Clicking on any will take you direct to the page.

Please send any comments on this tool to: [research@bristol.gov.uk](mailto:research@bristol.gov.uk). All datasets within the Ward Profile Tool can be downloaded from [Open Data Bristol](#).

# Adult Social Care

Bristol City Council

September 2023

## Brislington West

### Further Information

#### Data

Figures quoted are 'as at' the last day of that particular month.

#### Calculation

Data is expressed as a rate per 1,000 of the ward population within the cohort selected (i.e. social care data). Latest population uses the Census 2021 data. Caution should be taken when viewing trend previous to this, which uses mid-year population estimates. Historic data may be changed once the Office for National Statistics revise previous mid-year estimates.

#### Comparing wards against the Bristol Average

Wards are colour-coded to show any significant difference from the Bristol Average. Social Care Data uses standard deviation to identify whether the gap is significant.

Significantly High  
Not Significantly Different  
Significantly Low

#### Bristol Average

#### Clients in Care Homes aged 65+

#### Bristol Average

#### Clients receiving a community based service aged 65+

# Child Poverty

Children living in low income families

## Brislington West

### Further Information

#### Data & Calculation

The percentage of children living in low income families by ward, by financial year ending (FYE). Low income is a gross income measure Before Housing Costs and includes contributions from earning, state support and pensions. Percentages are rounded to 1 decimal point. Relative low income measures families on low income within the referenced year. Absolute low income measures families in low income compared to FYE 2011. Caution, although population estimates are the latest available at the time, some ward populations may not reflect more recent changes in the local population. Therefore, some percentages should be viewed with care.

#### Comparing wards against the Bristol average

Wards are colour-coded to show any significant difference from the Bristol Average. To measure whether the gap is significant, child poverty data uses standard deviation.

# Brislington West

## Further Information

**Data**  
Figures for crime offences and youth offenders are a total for the respective year. The number of youth offenders are used as the indicator rather than the number of offences committed. Quality of Life data is from the 2022-23 survey.

**Calculation**  
Crime offence and youth offender data is expressed as a rate per 1,000 of the ward population within the cohort selected (i.e. crime data). Census 2021 population data has been used for data from the year 2023. Quality of Life data is weighted by age and sex. Percentages are rounded to 1 decimal point.

**Comparing wards against the Bristol Average**  
Wards are colour-coded to show any significant difference from the Bristol Average. To measure whether the gap is significant; crime offences and youth offenders data uses standard deviation whilst the quality of life data uses the statistical 't-test'.

Significantly Better  
Not Significantly Different  
Significantly Worse

Youth Offenders	2022/23	Rate per 1,000	5.1	4.5

### Brislington West

#### Further information

##### Data & Calculation

Based on all children in Bristol local authority maintained schools, academies and free schools (but not independent schools). The Bristol total will include pupils living outside the area but the ward figures will not. \*Due to the Coronavirus (Covid-19) pandemic, attainment data is not available for the years 2020 and 2021.

Most figures are expressed as a percentage of pupils in a given cohort. Attainment 8 and Progress 8 scores are measures from Department for Education. Attainment 8 is an average across 8 subjects (extra weighting is given to English and Maths). Progress 8 compares how well a pupil has progressed across the same 8 subjects, compared nationally to other pupils with the same prior attainment at the end of Key Stage 2. Percentages are rounded to 1 decimal point.

##### Comparing wards against the Bristol Average

Wards are colour-coded to show any significant difference from the Bristol Average. Education data uses standard deviation to identify whether the gap is significant.

## Further Information

### Data

Census 2021 data produced by the Office for National Statistics. This pages combines data relating to health issues and disability, carers and general health.

### Calculation

Ward data is expressed based on either the number of people or number of households. Percentages are based upon the total number of people or households within the ward. Bristol data uses the total across all wards.

Percentages are rounded to 1 decimal point.

### Comparing wards against the Bristol Average

Wards are colour-coded to show any significant difference from the Bristol Average. Health data uses standard deviation to identify whether the gap is significant.

- Significantly High
- Not Significantly Different
- Significantly Low

#### Further Information

**Data**  
Quality of Life data is from the 2022-23 survey. Public Health Child Measurement data 2021/22-2022/23 for children in reception year and year 6 represents the first data available post-Coronavirus (Covid-19) pandemic.

**Calculation**  
Both Quality of Life and Public Health Child Measurement data is expressed as a percentage. Quality of Life data is weighted by age and percentage. Public Health Child Measurement data is an average of the 2 year period and excludes wards with less than 100 pupils measured over that period. Percentages are rounded to 1 decimal point.

**Comparing wards against the Bristol average**  
Wards are colour-coded to show any significant difference from the Bristol Average. To measure whether the gap is significant Public Health Child Measurement data uses statistical confidence intervals, whilst quality of life data uses the statistical 't-test'.

- Significantly Better
- Not Significantly Different
- Significantly Worse

Healthy Lifestyle Indicator	Period	Ward Statistic (%)	Bristol Average (%)
▲			
% above average mental wellbeing	2022	7.0	6.7

% children in year 6 (10/11yr olds) who have excess weight	2021/22 - 2022/23	31.2	35.6
% households where someone smokes regularly within the home	2022	4.6	3.6
% overweight or obese	2022	54.9	47.5
% who do enough regular exercise each week	2022	68.7	63.7
% with illness or health condition which limits day-to-day activities at least a little	2022	29.7	29.4

### Brislington West

#### Further information

**Data**  
Data expresses life expectancy in years, separately for males and females.

**Calculation**  
Life expectancy is normally calculated by taking a three year average. However, the period 2020-2022 uses a two year average. Numbers for this period are also provisional and subject to change. A delay in ward population estimates from the Office for National Statistics means year 2020 population estimates have been used instead. Once new estimates are published life expectancy numbers will change.

**Comparing wards against the Bristol average**  
Wards are colour-coded to show any significant difference from the Bristol Average. Life expectancy data uses statistical confidence intervals to identify whether the gap is significant.

Significantly Better

# House Prices

Median House Price Statistics, produced by Office for National Statistics.

## Brislington West

### Further Information

#### Data

Data represents the price paid (£) for residential dwellings sold at market value, using open data from HM Land Registry.

Data is published quarterly and represents a 'rolling year'. This data starts with the year-ending March 2011.

#### Calculation

The data used takes the 'median' (middle value) price paid across each 'rolling year'. A minimum of five records are required to ensure a robust house price that is representative of prices paid in a particular area.

#### Comparing wards against the Bristol Average

Wards are colour-coded to show any significant difference from the Bristol Average. House Price Data uses standard deviation to identify whether the gap is significant.

### Further information

#### Data

Census 2021 data produced by the Office for National Statistics. Population estimates include people who are 'usually resident' in Bristol. This includes students, school boarders at their term time address and long-term migrants (i.e. coming to UK for more than a year).

### Number by quinary population age bands - All Persons

### Number by quinary population age bands - Female

### Number by quinary population age bands - Male

# Brislington West

## Further Information

**Data**  
Census 2021 data produced by the Office for National Statistics.

**Calculation**  
Ward data expresses religion as a percentage of the total ward population. Bristol data expresses total religion as a percentage of the total population. Percentages are rounded to 1 decimal point.

**Comparing wards against the Bristol Average**  
Wards are colour-coded to show any significant difference from the Bristol Average. Religion data uses standard deviation to identify whether the gap is significant.

Significantly High  
Not Significantly Different  
Significantly Low

	Brislington West	Bristol Average		Brislington West	Bristol Average
% No religion	54.3	51.4	% Sikh	0.1	0.5
% Christian	34.7	32.2	% Other religion	0.6	0.7
% Muslim	2.5	6.7	% Buddhist	0.4	0.6
% Hindu	0.6	0.8	% Jewish	0.1	0.3
			% Religion not stated	6.7	6.9

## Ward Comparison (No religion)

### Futher Information

#### Data & Calculation

The data is from the Quality of Life Survey 2022-23. Results are expressed as a percentage of respondents, weighted by age and sex. Percentages are rounded to 1 decimal point.

#### Comparing wards against the Bristol Average

Wards are colour-coded to show any significant difference from the Bristol Average. Quality of Life data uses the statistical 't-test' to identify whether the gap is significant'

Significantly Better  
Not Significantly Different  
Significantly Worse  
Significantly High  
Significantly Low

Indicator	Theme	Ward Statistic	Bristol Average
% satisfied with their local area	Community & Living	79.0	75.2
% who agree people from different backgrounds get on well together in their neighbourhood	Community & Living	76.5	73.6
% who feel they belong to their neighbourhood	Community & Living	67.5	65.1
% who have access to the internet at home	Community & Living	94.5	96.4
% who lack the information to get involved in their community	Community & Living	30.1	26.8
% who volunteer or help out in their community at least 3 times a year	Community & Living	50.4	47.2
% victim of racial discrimination or harassment in last year	Crime & Safety	3.3	5.3
% who feel police and public services successfully tackle crime and anti-social behaviour locally	Crime & Safety	22.0	22.3
% who think domestic abuse is a private matter	Crime & Safety	2.3	6.2
% whose fear of crime affects their day-to-day lives	Crime & Safety	13.6	17.4
		35.8	39.7
% satisfied with the range and quality of outdoor events	Culture & Leisure	47.7	53.2
% who participate in cultural activities at least once a month	Culture & Leisure	26.8	31.9
% who play sport at least once a week	Health & Wellbeing	49.7	53.8
% who see friends and family as much as they want to	Health & Wellbeing	85.9	77.6
% concerned about climate change	Sustainability & Environment	84.4	86.6
% satisfied with the general household waste service	Sustainability & Environment	82.1	73.7
% satisfied with the quality of parks and green spaces	Sustainability & Environment		73.1
% satisfied with the recycling service	Sustainability & Environment		72.8
% who think air quality and traffic pollution is a problem locally	Sustainability & Environment	73.6	70.1
% who think street litter is a problem locally	Sustainability & Environment	77.7	82.2
% who visit Bristol's parks and green spaces at least once a week	Sustainability & Environment	54.9	56.0
% satisfied with the local bus service	Transport	34.0	37.5
% who ride a bicycle at least once a week	Transport	27.9	25.1
% who think traffic congestion is a problem locally	Transport	84.2	74.4

% who walk or cycle to work	Transport	27.9	32.0

# Background Information to Ward Profiles

The Ward Profiles show data for the 34 Bristol City Council wards. This update contains the latest data as of November 2023 and includes data updates for; children with excess weight, life expectancy and premature mortality. This follows the October 2023 update; adult social care, children services, claimant count, education, house prices, jobs, pension credit and youth offending. The interactive tools compare data for each of the wards against the Bristol (citywide) average and highlights any significant differences for that ward.

All datasets within the Ward Profiles tool can be downloaded from [Open Data Bristol](#). This is the Open Data platform for Bristol which includes datasets with the ability to build custom maps and charts within the platform or to export the datasets.

The Ward Profiles Tool is produced by the Insight, Performance & Intelligence Service of Bristol City Council. All data has been collated , analysed and produce by this service unless otherwise. Further products are available on our [Statistics and census information](#) web page or by email; research@bristol.gov.uk.

The Ward Profiles Tool is part of the overall Joint Strategic Needs Assessment (JSNA) process. They provide a local ward-based focus on the data produced for the JSNA Health and Wellbeing data profile, which is updated throughout the year. Further information, including the JSNA data profile and chapters, is available on our [Joint Strategic Needs \(JSNA\)](#) web page.

**Data release period** The Ward Profiles are updated regularly during the year with new data. As new data for each of the datasets is available (i.e. publication dates) at different times of the year, the data within the Ward Profiles Tool may not always align with that found in other reports. At the top of each topic page (i.e. beneath the page title) we confirm the time period that is relates.

**Data sources** for all topics covered by the Ward Profiles can be found on our Sources page.

# Mapping Tools

Bristol City Council provides a number of web-based tools which are designed to provide users with access to maps and spatial information quickly and easily. **CLICK ON THE TITLE LINKS BELOW THE IMAGES** to follow the links.

## PinPoint

**Pinpoint** is designed to help locate local information on the most convenient services from a specific location. This includes details such as opening times and contact numbers.

Local information is organised under themes (e.g. community and safety, education, housing and property). In addition, there is information on council assets and the historic environment.

## My Neighbourhood

**My Neighbourhood** includes links to relevant statistical data and information such as planning applications, waste collections and political representation in your area. All of which is summarised in a single view.

You can also do a "find my nearest" search for a range of facilities to any given address.

## Know Your Place

**Know Your Place** provides access to a variety of historic maps covering the City of Bristol. The majority of the maps are scanned from original archives held at the Bristol Record Office.

The scanned images have been overlain on Modern Ordnance Survey Mastermap digital mapping and contextual layers. Also included are historical environment records, pictures, postcards and photo collections.

## Bristol ArcGIS Online Maps

**Bristol ArcGIS** is a collection of online maps, map apps and story maps.

## Open Data Bristol

**Open Data Bristol** is a site for sharing data in Bristol. It also includes a number of dashboards such as; Quality of Life, Air Quality and Council Elections.

The data can be viewed, used and re-used subject to the licence terms. There is also the ability to build maps and charts (i.e. located under the 'Tools' tab) within the platform. You can also export the data should you wish to use your own analysis tools.

# Significance Ratings

To compare any significant gap between a ward and the Bristol average we have used one of three methods;

**Standard Deviation** is a way of expressing how much each ward deviates from the mean value for all 34 wards in Bristol. This has been used as part of a calculation comparing each ward to the Bristol average. The difference is judged significant if it is greater/lower than the Bristol average +/- the standard deviation across all wards.

**Confidence Intervals** provide an upper (confidence interval) and lower (confidence interval) number that provides a range within which we can be confident a ward figure lies within. The level of confidence is based on a 95% certainty. The difference is judged significant if either the ward lower confidence interval is above the upper confidence interval of the Bristol average or the ward higher confidence interval is below the Bristol average lower confidence interval.

**Statistical 't' test** is a statistical test that measures the difference in group means divided by the pooled standard error of the two group means. This calculates a number (the t-value) illustrating the significance of the difference between the two group means being compared, and estimates the likelihood that this difference exists purely by chance (p-value).

## Overlapping significance ratings within ward comparison charts

Overlapping significance ratings happen where either confidence intervals or the statistical 't'-test have been used to calculate significance. Ward comparison charts are ordered with the biggest number starting at the top. Sometimes the range of wards "not significantly different" from the average may overlap with the range of wards "significantly better" and/or "significantly worse" than the average. This may appear counterintuitive at first glance but can happen due to these calculation methods. The power of statistical 't'-test to detect a significant difference is greater in wards with larger numbers of respondents or smaller standard errors. The confidence interval has a +/- probability, defined by a lower limit and upper limit, based on a 95% confidence level which is a measure of the degree of uncertainty/certainty in a sampling method.
