

Landscape design

In recent years the quality of our work has been recognised locally and nationally.

Recent projects include:

St Paul's Community Park

Transformation of a city centre park. Working within a historic context to provide a safe, welcoming green space with a new children's play area.

Arnos Vale Cemetery Restoration

Leading a team of specialist consultants to restore this unique historic landscape. Working in partnership with Arnos Vale Cemetery Trust.

Hannah More Primary School grounds

Creation of multi-functional outdoor spaces for the school.

Barton Hill Masterplan

Designing new parks and public spaces. Working in partnership with Community at Heart and involving local residents.

Multi-award winning Arnos Vale Cemetery Restoration, completed April 2010

We design landscape and public realm improvement projects. Our design services are commissioned by client teams within the Council and by organisations in the city. Projects undertaken have improved schools, neighbourhood parks, public spaces, streets, play areas, housing estates, and historic environments. We design with an understanding of local context, community views and value for money.

We work with other teams within the council to:

- help develop strategic projects such as Area Green Space Plans;
- formulate planning policy related to green infrastructure;
- design projects to integrate public transport within the public realm; and
- appraise sites identified for development.

Our designers also advise planning officers on the landscape impact of development proposals.
