Dear Landlord,

**RE: fitting home safety equipment**

My Health Visitor has referred me to Bristol City Councils Home Safety Equipment Scheme.

Evidence shows that unintentional Injury is a leading cause of death and disability among young children and results in more hospital admissions annually than any other cause. The availability of safety equipment such as cupboard locks, safety gates is associated with reduced injury.

I am writing to you because Bristol City Council are aiming to lead the way in supporting children under 5 to stay safe in their home by installing safety equipment such as safety gates, fire guards, window restrictors, cupboards locks and blind cleats. The equipment will be installed by trained professional carpenters. However they are unable to return to the property to remove any equipment when it is no longer required.

Please could you provide your written consent for Bristol City Council carpenters to fit the equipment by completing the form below and returning it to me at the property?

Kind regards

I give permission to Bristol City Council to fit Home Safety Equipment at (provide property address)
