

NORTH & WEST BRISTOL

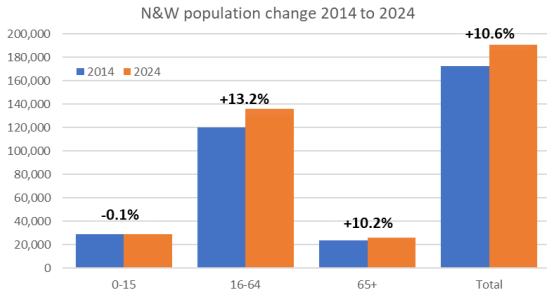

Locality Partnership Health Profile

An analysis of health, wellbeing and wider determinants in North and West Bristol, comparing the data with Bristol and England overall. Subset profiles for North and West (Inner) Bristol and North and West (Outer) Bristol are also included.

January 2026

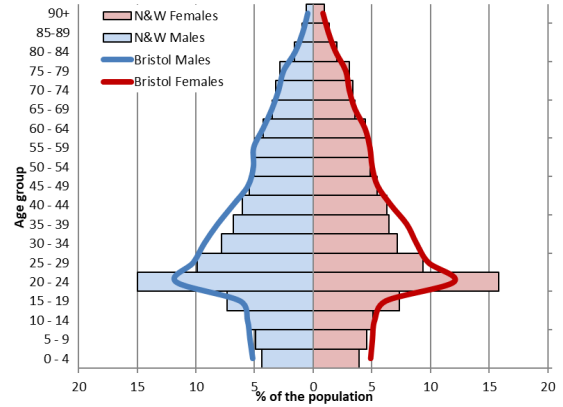

North and West (N&W) Bristol

POPULATION (2024 Mid-Year Estimates)

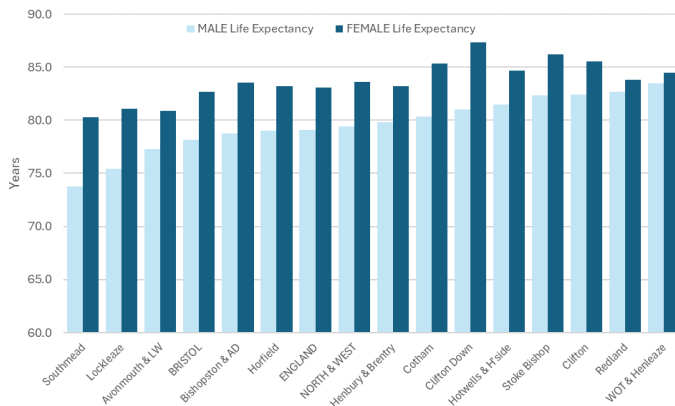

The total population in North & West Bristol has increased at a similar rate to the city average (11.4%) as has the 0-15 age group (-0.1%). Growth in the older age group accounts for two-thirds of the city's increase in the 65+ category.

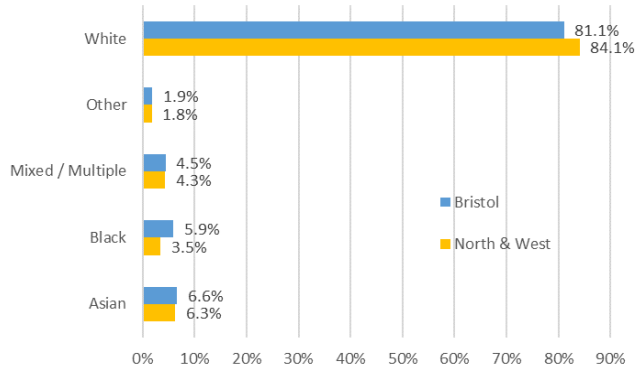

- N&W (Inner) wards:**
 Bishopston & Ashley
 Down
 Clifton Down
 Clifton, Cotham
 Hotwells & Harbourside
 Redland
 Stoke Bishop
 Westbury-on-Trym & Henleaze
- N&W (Outer) wards:**
 Horfield
 Henbury & Brentry
 Avonmouth & Lawrence Weston
 Lockleaze
 Southmead

LIFE EXPECTANCY AT BIRTH (2021-23)

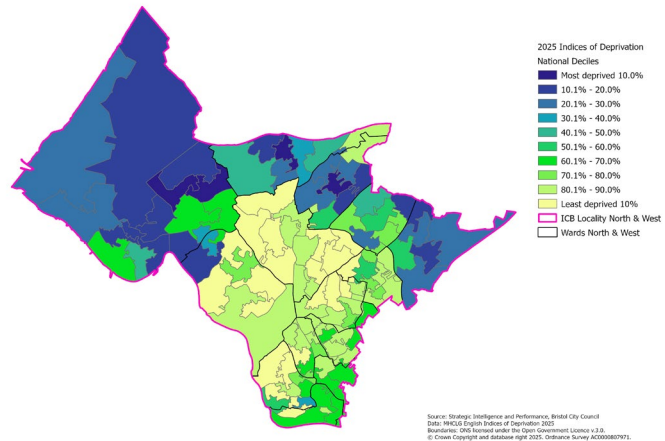

ETHNICITY (Census 2021)

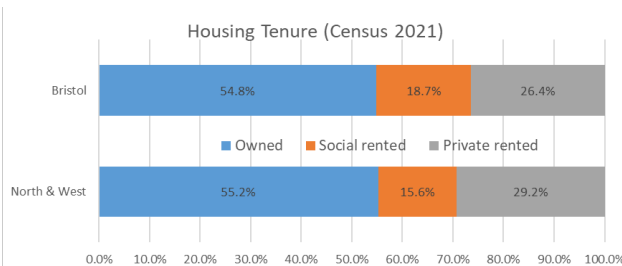

DEPRIVATION (IMD2025)

- North and West Bristol has a significantly lower proportion of residents living in the 10% most deprived areas of Bristol than the Bristol average (3.7% v 11.1%) (IMD 2025)
- Southmead ward is the fourth most deprived ward in the city, Avonmouth & Lawrence Weston is the 5th most deprived, Lockleaze is the 6th most deprived and Henbury & Brentry is the 7th most deprived ward in the city
- Lawrence Weston South is the most deprived LSOA in N&W, and is ranked the 10th most deprived in all of Bristol and the 979th most deprived in England (out of 33,755 LSOA's)
- 15.6% of children under 16 in North and West Bristol live in low income families, significantly lower than both the Bristol average of 23.0% and the UK average of 21.8% (2023/24).

HOUSING

ADULT SOCIAL CARE

- 259 households are living in temporary accommodation in North and West Bristol, which equates to 15.3% of all households housed in temporary accommodation by Bristol City Council (30th April 25)

A snapshot taken on 14th December 2025 of North and West Bristol shows there were:

- 1,583 service users, 700 (44%) were male and 883 (56%) were female
- The primary support reason was Physical (45%), followed by Learning Disability Support (19%), Mental Health Support (14%), Support with Memory and Cognition (9%) and other (7%)
- The main care types required by service users include Homecare (25%), Direct payments (15%), Nursing (15%), Supported Living (14%), Supported accommodation (12%) and Residential (11%).

Locality Partnership Health Profile 2025/26

OFFICIAL

Locality Partnership Health Profile

North and West (N&W) Bristol

Notes:

(1) Data is available at different geographic levels within England. For this profile we have used Lower-layer Super Output Area (LSOA) data which is small geographies of approximately 1,500 residents or 650 households, or ward data if not available. These do not fit exactly to locality or PCN boundaries but are the best match possible. The data in these locality profiles is only a small part of the full Joint Strategic Needs Assessment (JSNA), please see www.bristol.gov.uk/jsna

(2) Local data has been calculated from source but not yet published at national level. Not possible to benchmark against.

(3) The Quality of Life Survey is specific to Bristol and not comparable with other local authorities, or nationally.

(4) Trend data not available due to a change in the wording / definition of the question. 2024/25 data not directly comparable with previous years.

(5) Seasonal influenza vaccine uptake in GP Patients is an automated collection from a large sentinel group of 36 GP practices in Bristol.

(6) A maternity is a pregnancy resulting in the birth of 1 or more children (including stillbirths)

(7) Long-acting reversible contraception (LARC) is defined as contraceptive methods that require administration less than once per cycle or month. Included in the category of LARC for this indicator are subdermal implants and coils. Injections are not included.

North and West (Outer) Bristol

POPULATION (2024 Mid-Year Estimates)

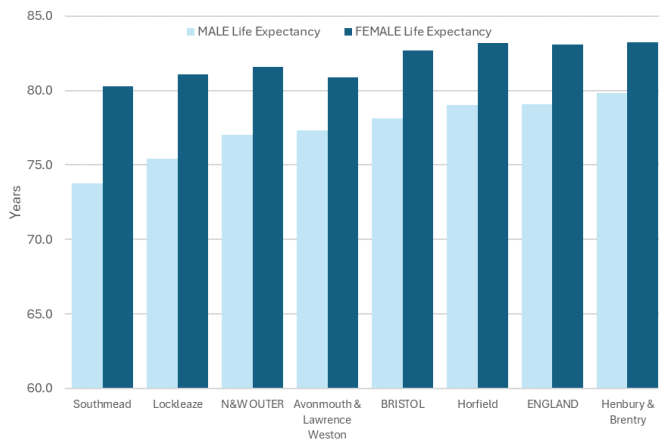

N&W (Outer) wards:
 Avonmouth & Lawrence Weston
 Henbury & Brentry
 Horfield
 Lockleaze
 Southmead

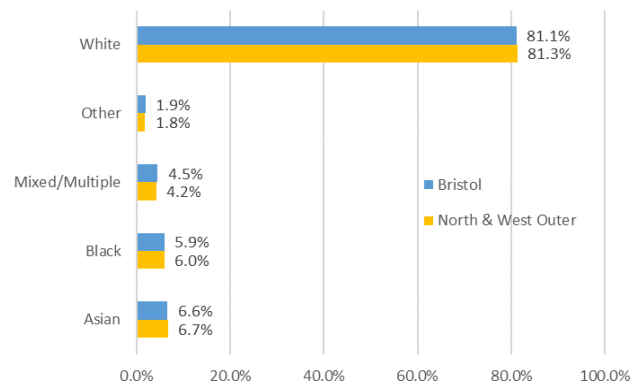

The total population has grown at a similar rate to the city average (11.4%) as has the working age population (Bristol = 15.6%). There are now 892 more children in the sub-locality than 10 years ago, representing a 6.3% growth, a stark difference to the city average (-0.1%).

LIFE EXPECTANCY AT BIRTH (2021-23)

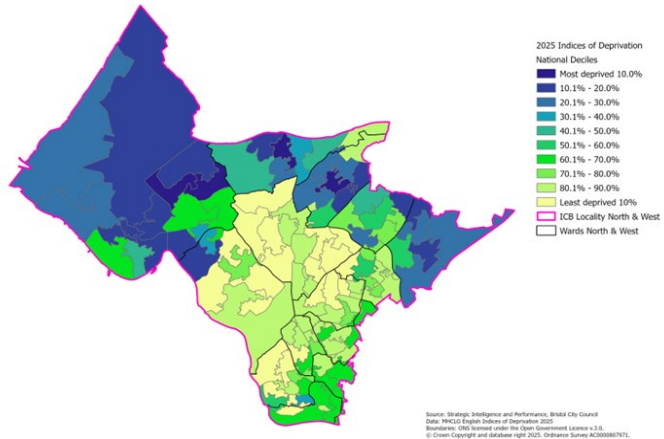

ETHNICITY (Census 2021)

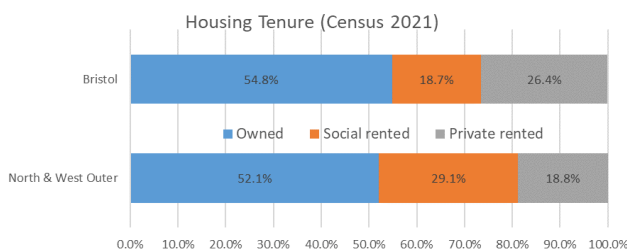

DEPRIVATION (IMD2025)

- North and West (Outer) Bristol has a lower proportion of residents living in the 10% most deprived areas of Bristol than the Bristol average (9.6% v 11.1%) (IMD 2025)
- Southmead ward is the fourth most deprived ward in the city, Avonmouth & Lawrence Weston is the 5th most deprived, Lockleaze is the 6th most deprived and Henbury & Brentry is the 7th most deprived ward in the city
- Lawrence Weston South is the most deprived LSOA in N&W (Outer), and is ranked the 10th most deprived in all of Bristol and the 979th most deprived in England (out of 33,755 LSOA's)
- 25.0% of children under 16 in North and West (Outer) Bristol live in low income families, higher than both the Bristol average of 23.0% and the UK average of 21.8% (2023/24).

HOUSING

- 208 households are living in temporary accommodation in North and West (Outer) Bristol, which equates to 12.3% of all households housed in temporary accommodation by Bristol City Council (30th July 25)

ADULT SOCIAL CARE

A snapshot taken on 14th December 2025 of North and West Bristol shows there were:

- 1,583 service users, 700 (44%) were male and 883 (56%) were female
- The primary support reason was Physical (45%), followed by Learning Disability Support (19%), Mental Health Support (14%), Support with Memory and Cognition (9%) and other (7%)
- The main care types required by service users include Homecare (25%), Direct payments (15%), Nursing (15%), Supported Living (14%), Supported accommodation (12%) and Residential (11%).

Locality Partnership Health Profile 2025/26

North and West (Outer) Bristol

The report below shows how the locality compares with both the Bristol and England averages across a range of indicators. The locality value is coloured to show whether the value is statistically significantly better (green dot), similar (amber dot) or statistically significantly worse (red dot) than the Bristol and England averages.

● Better ● Similar ● Worse

% satisfied with life (QoL survey)	2024/25	+	61.2%	64.1%	Note 3		●	n/a
% who rarely or never feel close to other people (QoL survey)	2024/25	-	19.0%	14.0%	Note 3		●	n/a
% comfortable using digital services (QoL survey)	2024/25	+	75.8%	81.1%	Note 3		●	n/a

* Polarity: +/- This shows whether a higher or lower figure is preferred i.e. do we hope to see a bigger/increasing or a smaller/reducing number. For example we would like to see higher vaccination coverage and a lower proportion of households with a smoker

Trend data - sparklines have been used to visually represent trend data using the most recent three years / periods

Locality Partnership Health Profile

North and West (Outer) Bristol

Notes:

- (1) Data is available at different geographic levels within England. For this profile we have used Lower-layer Super Output Area (LSOA) data which is small geographies of approximately 1,500 residents or 650 households, or ward data if not available. These do not fit exactly to locality or PCN boundaries but are the best match possible. The data in these locality profiles is only a small part of the full Joint Strategic Needs Assessment (JSNA), please see www.bristol.gov.uk/jsna
- (2) Local data has been calculated from source but not yet published at national level. Not possible to benchmark against.
- (3) The Quality of Life Survey is specific to Bristol and not comparable with other local authorities, or nationally.
- (4) Trend data not available due to a change in the wording / definition of the question. 2024/25 data not directly comparable with previous years.
- (5) Seasonal influenza vaccine uptake in GP Patients is an automated collection from a large sentinel group of 36 GP practices in Bristol.
- (6) A maternity is a pregnancy resulting in the birth of 1 or more children (including stillbirths)
- (7) Long-acting reversible contraception (LARC) is defined as contraceptive methods that require administration less than once per cycle or month. Included in the category of LARC for this indicator are subdermal implants and coils. Injections are not included.
