BY EMAIL to: Mark Ashdown, Bristol Tree Forum

Dear Mark,

Please find enclosed the results of your recent enquiry into the site at Brislington Meadows. A 0.5km buffer zone has been added to your enquiry site to form the "search area" shown on the enclosed maps as a purple line.

The document 'Key to Colours and Codes on Maps' contains additional information relating to the maps.

The requested search was for habitat and site data only.

As our records may not always be comprehensive or up to date, it is recommended that surveys for species and habitats are carried out and specialist groups consulted.

Following best practice and national guidance, we do not charge for data, only the time taken to perform the search and prepare maps.

Please consider submitting any species records you may gather for this site as a result of this data search.

It is only because of the continuing support of the public, organisations and consultants that we can continue to offer our service.

Yours sincerely

Daniel Marshall
