

## Planning Appeal 3308537 - Land at Broom Hill/Brislington Meadows, Bristol

PDF extract from the Council's Pinpoint map service at <https://maps.bristol.gov.uk/pinpoint/>.

The SNCI layer in the Environment tab. This shows the SNCIs referred to in proof of evidence of Mr Paul Connelly, Director at LDA Design, for the Appellant at paragraphs 10.4 - 10.8.

Pinpoint SNCI dataset layer information - <https://data.bristol.gov.uk/geonetwork/srv/eng/catalog.search#/metadata/a/4f1ddb4e-b218-4f1e-a8bc-23fbd6725f58>

### Sites of Nature Conservation Interest (SNCI)

This dataset comprises polygon data showing Sites of Nature Conservation Interest within Bristol.

Sites of Nature Conservation Interest (SNCIs) are sites which contain features of substantive nature conservation value at a local level. The sites are designated through a Local Sites Partnership (LSP), using an agreed set of criteria. The LSP for the West of England, is formed by ecologists from each of the unitary authorities, Avon Wildlife Trust, BRERC, Natural England, Forestry Commission, Environment Agency, and the local RIGS group. These sites then receive a level of protection through local planning policy, in-line with PPS9.
