

## Comparison between the Appellant's Original AIA – 26 May 2022 and TEP corrections of 8 February 2023

### [CD2.2 Arboricultural Impact Assessment V2 \(The Environment Partnership\) - submitted to the Council on 26 May 2022](#)

## 4.0 Tree Population

- 4.1 34 individual trees (T1-T34); 47 groups of trees (G1-G47); and 2 woodlands (W1-W2) were recorded within influencing distance of the application site.
- 4.2 Feature locations, their quality categories, canopy spreads and root protection areas are shown on Drawing 1. The following table provides the total canopy area for mapped trees and the total length of mapped hedgerow on Drawing 1. In some cases this may be more than the absolute area of cover due to canopy overlap between adjacent features.

*Table 3 Existing canopy coverage*

Trees	Groups	Woodland	Hedgerow
0.3760ha	1.7860ha	0.7431ha	0m

- 4.3 All arboricultural information recorded during the survey is presented at Appendix A.
