

Notice of proposed tree removal and replacement

Site Name: Redcliff Hill

Number of trees: 1

Type of tree: Lime (*Tilia x europea*)

Date of notice: 13 October 2026

Consultation period: 13 October to 10 November 2026

Reason for removal

Bristol City Council is proposing to remove one lime (*Tilia x europea*) tree on Redcliff Hill to create space for a new cycle lane as part of the Redcliffe Way transport corridor project.

Other design options for this project were considered but unfortunately were unfeasible because of maintenance and health and safety concerns. The tree is still growing, meaning its roots could damage the proposed cycle lane. There were also concerns that during construction, the tree could be damaged, making it unstable and susceptible to disease.

Replacement of the tree

20 new trees will be planted as part of the connecting Bedminster Bridges project. We are also looking to plant extra trees within the other schemes that make up the City Centre transport corridor programme.
